Signature of Permittee:_____ Date:_____

GENERAL PROVISIONS

Permittee shall comply with the provisions of the Standard Specifications for Public Works Construction, latest edition. All work in public right-of-way shall be per City Standards, policies, codes, and these Special Provisions as well as these general conditions, and shall be done under the inspection of, and to the satisfaction of, the City Engineer or his Representative.

Work in the public right-of-way shall be done between the hours of 6:30 a.m. and 5:00 p.m. Monday through Friday. No work shall be performed at night, on Saturdays, Sundays or on holidays observed by the City of Lancaster, except work pertaining to the public safety, or with the written permission of the City Engineer, and in accordance with such regulation as he shall furnish in writing. Before performing any work at said times, except work pertaining to the public safety, the permittee shall give written notice to the City Engineer so that proper inspection may be provided. "Night" as used in this paragraph shall be deemed to include the hours from 5:00 p.m. to 6:30 a.m. of the next succeeding day.

All persons working within the City right-of-way shall wear orange safety shirts, vests, or jackets (identifying to motorists that such personnel are part of an organized construction crew). All shirts, vests or jackets worn at night must be reflective. All persons working within City right-of-way or on City property shall wear hard hats.

Traffic Control and Public Convenience. The permittee shall comply with Section 7-10 of the Standard Specification and provide safe and continuous passage for pedestrian and vehicular traffic at all times. The permittee shall provide and maintain all necessary flagmen, barricades, delineators, signs, flashers, and any other safety equipment as set forth in the latest publication of the State of California, Department of Transportation, "Manual of Traffic Controls for Construction and Maintenance Work Zones," or as required by the City Engineer to ensure safe passage of traffic. In addition to the requirements specified in subsection 7-10 of the Standard Specifications, the permittee shall maintain access to all adjacent properties. In no case shall traffic be diverted from the existing travel way without prior approval of the City Engineer. A detailed detour plan may be required by the City Engineer, where detours of more than four (4) hours are needed, from a Registered Traffic Engineer by the Contractor, for approval five working days prior to commencement of construction, arrow boards are required on all lane closures on major streets. Solar powered lighted-associated arrow boards are required on overnight detours in residential areas. All associated costs are the permittee's responsibility.

All inspection costs incurred incidental to this work shall be the permittee's responsibility. Any trees, shrubbery or landscaping damaged shall be replaced to the satisfaction of their owner or as directed by the City Engineer at permittee's expense.

Trench backfilling and resurfacing shall comply with the City of Lancaster's "Street Opening and Pavement Restoration," which is available upon request. Permanent sidewalk, parkway and pavement repairs shall be completed within 30 days of installation of facilities covered under permit. Non-compliance with these or other permit conditions may be cause for permit revocation.

SPECIAL PROVISIONS IF APPLICABLE

All trenches and/or open holes shall be filled, covered, or plated and adequately barricaded at the end of each day and whenever work is not in progress. One lane of traffic in each direction is to be kept open and clear at all times on street under construction. Permittee shall obtain a State Division of Industrial Safety Excavation Permit and file copy of same with the City Engineer prior to start of permitted work. Compaction in pavement and traffic areas shall be 90% min. with 95% in the upper three feet from the pavement surface or finished grade. Compaction tests required at locations and depths as determined by the City Engineer at cost of Permittee. Compaction in parkway and sidewalk areas shall be 90% min. relative compaction and shall be mechanically compacted. Concrete sidewalks or curbs shall be saw cut to the nearest score marks and replaced equal in dimensions to that removed with score marks matching existing score marks. Sidewalk shall be Class 520-C-2500 concrete 4" thick. Pipe bedding and backfill of excavation shall be in conformance with City Standards. Pavement replacement shall be in conformance with City Standards.
